

PRONAB SAMANTA

Backend Developer

pronabsamanta49@gmail.com | +91 74778 81157 | [pronab-dev.github.io](https://github.com/pronab-dev)

SUMMARY

Backend Developer with professional experience building and modernizing enterprise web applications using PHP, CodeIgniter, MySQL, and JavaScript. Skilled at migrating legacy systems, simplifying business workflows, and writing clean, maintainable code that solves real-world problems. Recognized with the Best Newbie Award for delivering measurable business impact within the first year. Continuously learning new technologies to grow as an engineer, with a goal of contributing to an international backend engineering team.

EXPERIENCE

Backend Developer | RT Network Solutions

June 2025 – Present

- Migrated multiple production applications from CodeIgniter 3 to CodeIgniter 4, modernizing legacy PHP codebases without disrupting live business operations.
- Independently implemented most backend modules for RTNS-FM, an attendance and claim management system built in collaboration with RTNS and TCS, while partnering with a senior developer on architecture and complex problems.
- Redesigned the monthly attendance approval workflow — replacing a manual, Excel-based process requiring two separate approvals with a streamlined system that lets Team Leads approve a full month's attendance in a few clicks.
- Designed core business logic, authentication, and authorization for enterprise-grade applications.
- Received the Best Newbie Award (January 2026) for contribution to RTNS-FM and overall backend development impact.

FEATURED PROJECT

RTNS-FM — Attendance & Claim Management System

Built for RT Network Solutions in collaboration with TCS.

- Problem: Monthly attendance approvals required two separate sign-offs and significant manual Excel work, creating delays and errors.
- Solution: Designed and built backend workflows enabling Team Leads to review and approve an entire month's attendance in a few clicks.
- Impact: Successfully adopted across the organization, cutting approval effort and time significantly; directly led to the Best Newbie Award.
- Technologies: PHP, CodeIgniter 4, MySQL, JavaScript.

TECHNICAL SKILLS

Languages & Frameworks: PHP, CodeIgniter 4, JavaScript, HTML/CSS

Database: MySQL — schema design, query optimization

Core Strengths: Authentication & Authorization, Business Logic Design, Debugging & Problem Solving, Legacy System Modernization, Clean & Reusable Code, Version Control (Git)

CURRENTLY LEARNING

REST APIs · React JS

EDUCATION

Bachelor of Arts — Rabindra Mahavidyalaya

2025

ACHIEVEMENTS

- Best Newbie Award — January 2026, RT Network Solutions. Recognized for contribution to RTNS-FM and backend development.
